## The marvelous Homework and Housework Machine

Kenn Nisbitt

1. Students and Kids need something to help them complete their homework and clean their bedroom.
2. The Marvelous Homework and Housework Machine is capable of writing ten pages of book reports in no time. Hence it would help students in their homework. It would solve maths problems and read geography for them.
3. Apart from helping children with their studies, the machine cleans, hangs up clothes on hangers and hooks, brushes their teeth and feeds them dessert.
4. The only thing that the machine will not do is eat the kids' share of Brussels sprouts because it smells awful.

B

1. No, I don't agree with the statement that The Marvelous Homework and Housework machine is exactly the thing that students and kids need. Such a Machine would make them lazy and dependent, as they would never try to complete their work on their own.
